FIRST AID

Eye Contact: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.
Skin Contact: Wash with soap and water. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. **Inhalation:** Remove to fresh air. **Ingestion:** Do not induce vomiting without medical advice. Call a poison center or doctor/physician if you feel unwell.

PRECAUTIONARY STATEMENTS:

User Precautions: Handle in accordance with good industrial hygiene and safety practice. May cause eye damage or irritation. Avoid contact with skin, eyes or clothing. Wash face, hands and any exposed skin with soap and water after handling. Wear protective gloves/protective clothing and eye/face protection when handling the concentrate. Applicators should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove clothing immediately if the product gets inside. Wash thoroughly and put on clean clothing.

- Do not use, pour, spill, or store concentrate near heat or open flame.
- Do not apply product to surface waters.
- Do not apply to people or pets.
- Do not allow this product to contact pollinators.
- Do not apply product to food, feed, plants grown for food, or plants that are sensitive to oils.

PRODUCT INFORMATION

Zone Out™ is a FIFRA 25(b) federally exempt product; and it is not registered by the United States Environmental Protection Agency. All active ingredients in Zone Out are on the USEPA "allowed active ingredient list." All inert ingredients in Zone Out are on the USEPA "eligible inert ingredients" list. Zone Out is biodegradable.

Zone Out contains plant essential oils that are inherently fragrant. This product's fragrance will dissipate in a short time. Essential oils may stain surfaces that absorb oils, including, but not limited to, plastic, vinyl siding, concrete, bare wood

and materials painted with flat or semi-gloss paint. Always test an inconspicuous area before use.

PRODUCT APPLICATION

Shake or agitate before diluting and during use. Apply using backpack, handheld, misting system, or cold fogging application tools directly on the areas and to pests to be treated. Do not store diluted solution overnight.

For best results, spray under shrubs, wood piles, leafy areas, and anywhere that is shaded and moist. Spray into trees, including up and under the leaves, where adult mosquitoes hide during the day. Treat harborage areas such as shrubbery and vegetation where mosquitoes may rest. Shrubby and vegetation around pools, marshy areas, and shorelines may be treated.

May also be sprayed on patios, eaves, windows, doorways, and porches, as well as around porch lights and utility boxes.

To control adult mosquitoes: Dilute 1 ounce of concentrate per gallon of water for light infestations and up to 3 ounces of concentrate per gallon of water for heavy infestations; apply until the treated area is completely wet.

To control adult fleas: Dilute 4 ounces concentrate per gallon of water for light infestations and up to 6 ounces concentrate per gallon for heavy infestations; apply until the treated area is completely wet.

Do not spray directly on ponds, lakes, rivers, or other bodies of water.

If overspray occurs to unintended areas, clean surfaces with warm, soapy water. Reapplication may be necessary depending on climate and pest pressures.

STORAGE AND DISPOSAL

Storage: Store in a cool, dry storage area inaccessible to children and pets. Do not freeze. **If empty:** Triple rinse container. Place in trash or offer for recycling if available.
